

Saturday Club is gathering momentum with more and more students joining to have fun and find out about our brains!

Brains on the playground!

Making sure we know where everything goes!

Drawing the brain stem

Working as a team

Amygdyla...pre frontal cortex...cerebellum...

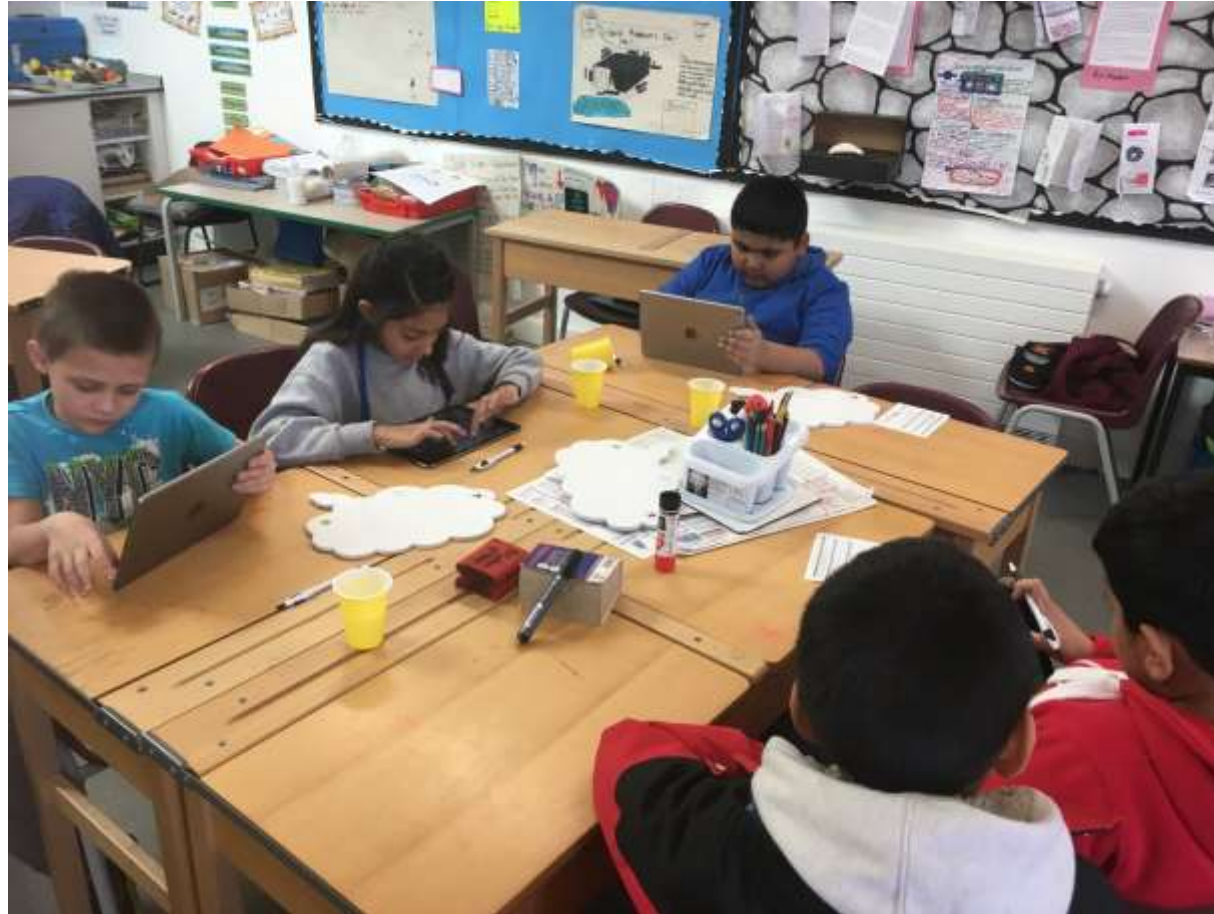

Smurf!

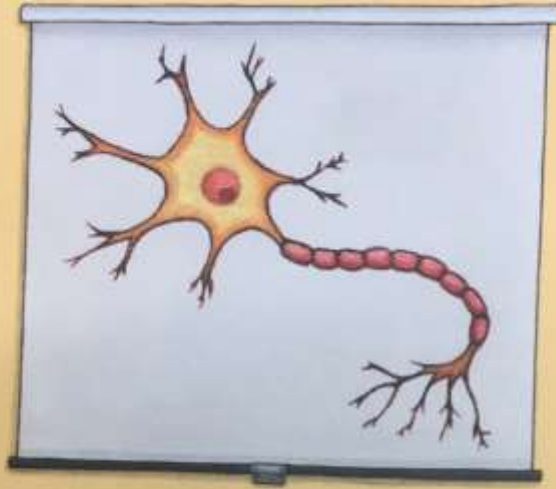

Individual study time

The Science bit!

Neurons

(NER-onz)

Neurons are everywhere in your brain. They are tiny brain cells that make electrical signals to send messages to other cells in your body telling them what to do.
