

Year 6 Support the British Heart Foundation

Year 6 have chosen to support the British Heart Foundation (BHF) this year. Coronary heart disease is the UK's single biggest killer and we really want to support this charity by raising money to help them with their research. The BHF also helps inform millions of people every year with their up to date information about heart disease so the UK public are better informed. In addition to this, they work hard to protect heart health and fight for better services for patients. For more information, please visit their website www.bhf.org.uk
