

Our long awaited Saturday ‘Neuroscience’ Club has started!

We learnt about the main parts of the brain and had a challenge to get us started.

We did not give up until we had succeeded!

Joshua and Bobby worked as a team

Mifam and Hamood knew the main parts of the brain

The Science bit!

Prefrontal Cortex

The **Prefrontal Cortex** (PFC, for short) is the part of your brain behind your forehead. It lets you make plans and decisions.

Amygdala

(uh-MIG-duh-luh)
The **Amygdala** is a tightly-packed group of cells deep within the center of the brain that controls your emotions.

Excited

Frightened

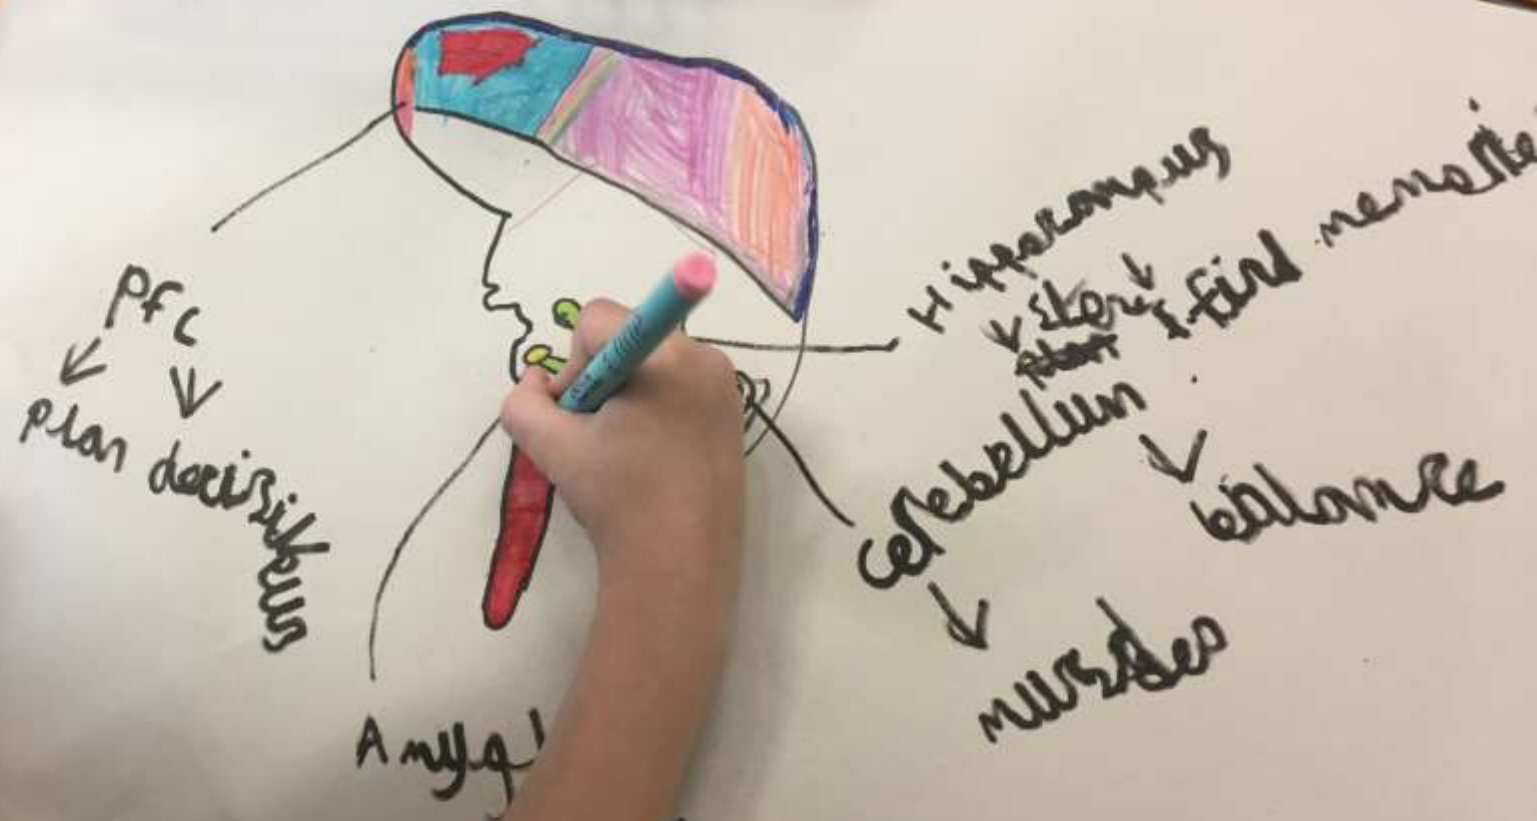

Hippocampus

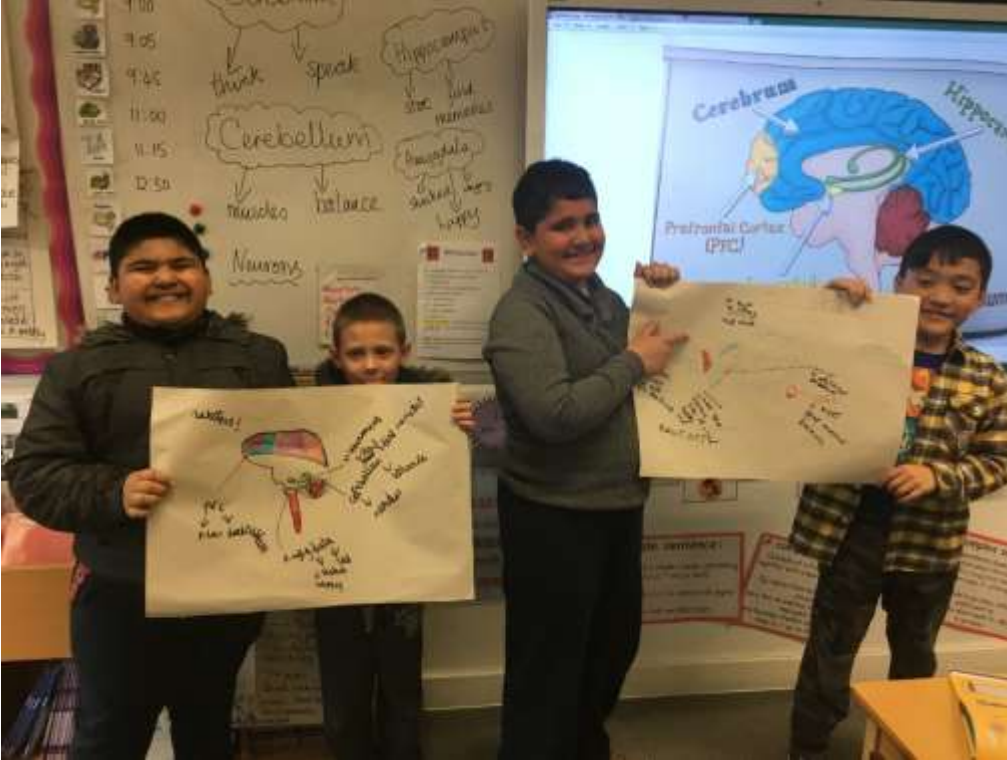

(hip-uh-KAM-pus)
The **Hippocampus** is at the center of your brain. It works like a file cabinet to help you store and find memories.

rethinkers?

sad
y

Our teams had to work out the best way of presenting their new found knowledge

Sorting books by categories that we decided upon ourselves.

By making decisions we were using our **pre frontal cortex**
