

Pupil Leader Achievements

Well done to all our Pupil leaders – You have made WHA proud!

Prefects

The prefects have worked hard this year to ensure the school runs smoothly at playtimes and lunchtimes.

They supported staff in the lunch hall and ensured that children walk sensibly around the school. They have taken their roles very seriously and worked very hard as a team.

Librarians

The librarians this year have done an absolutely fantastic job! They have kept the library ship-shape, they have helped the smaller children find books they need and, most importantly, they have been enthusiastically listening to Year 1s read every single day! Thanks to them, our Year 1s have grown in confidence and are really enjoying reading now. What superstars!

Peer Mentors

The Peer Mentors have been working hard supporting the younger children in the school. They have been very enthusiastic when working with the reception children.

They have been encouraging the children to play together and have been teaching them group games.

Some of the Peer Mentors have been training some year 5 children to take over from them in September, this has been very successful.

They are very supportive and caring and you often see them helping children into first aid.

Music Mentors

The Music Mentors have worked very hard this year fulfilling their role. They have been volunteering to help out with the younger children's collectives (Year 3&4) as well as KS1 Choir in the Autumn Term. Here they sit with children and help them to learn how to play the parts for their instrument. They also provide encouragement and motivation to the younger children. In the Choir, the Music Mentors have been doing warm ups as well as helping with administrative jobs (handing out letters etc.) The Music Mentors have also been helping out with moving and setting up instruments for concerts. They have been helping to keep the Music Room tidy. The values they have been showing are: Teamwork, Resilience, Respect, Positivity and Ambition.

Green Team

The Green Team members have done really well after a late start. To begin with the children did a litter pick of the school grounds and then they had to work very hard to clear all the weeds and overgrown Fennel in order to prepare the raised beds for planting. Once the beds were ready we planted Peas, Beetroot and Red Onions. Once the Beetroot was harvested Mrs Piper then took it home to boil it and the following day the children got to eat fresh, organic produce that they had helped to grow.

Some of the children then helped with the clearing and redesigning of the Burcher garden.

The children now have Miniature French Beans, Squash and Courgettes growing. This week the Rhubarb will be harvested and made into a crumble for them to eat on the last day of term.

All of the children have further developed excellent teamwork skills, tolerance and resilience during this year.

Maths Mentor

The Maths Mentors have done a great job running Puzzle club this year. They have supported the younger children create videos for the school's website and have enjoyed playing and creating new games. The Children have developed their presenting skills and have become more confident in solving a range of real life problems. It has been wonderful to see the younger years work with the older children, as they have shared ideas and shown the value of team work.

E-Safety & Computing Team

The e safety team have created posters about the importance of staying safe online. They have also given ways to stay safe online. These posters will be ready for September!

Buddies

The buddies have worked extremely hard alongside the peer mentors. Their attitude towards helping other children has been amazing! Their best achievements overall have been: suggesting a rota system (which has worked extremely well). A special mission to initiate positive play among year one and two and overall collectively we are all grateful to the whole school for helping us collect the Sainsbury's school vouchers to enable us to obtain new equipment for the buddy area.
